

U.S. Department of Energy

Office of Electricity Delivery and Energy Reliability

North American SynchroPhasor Initiative

DOE Update and Projects Intro

Phil Overholt

Atlanta, Georgia

October 17, 2012

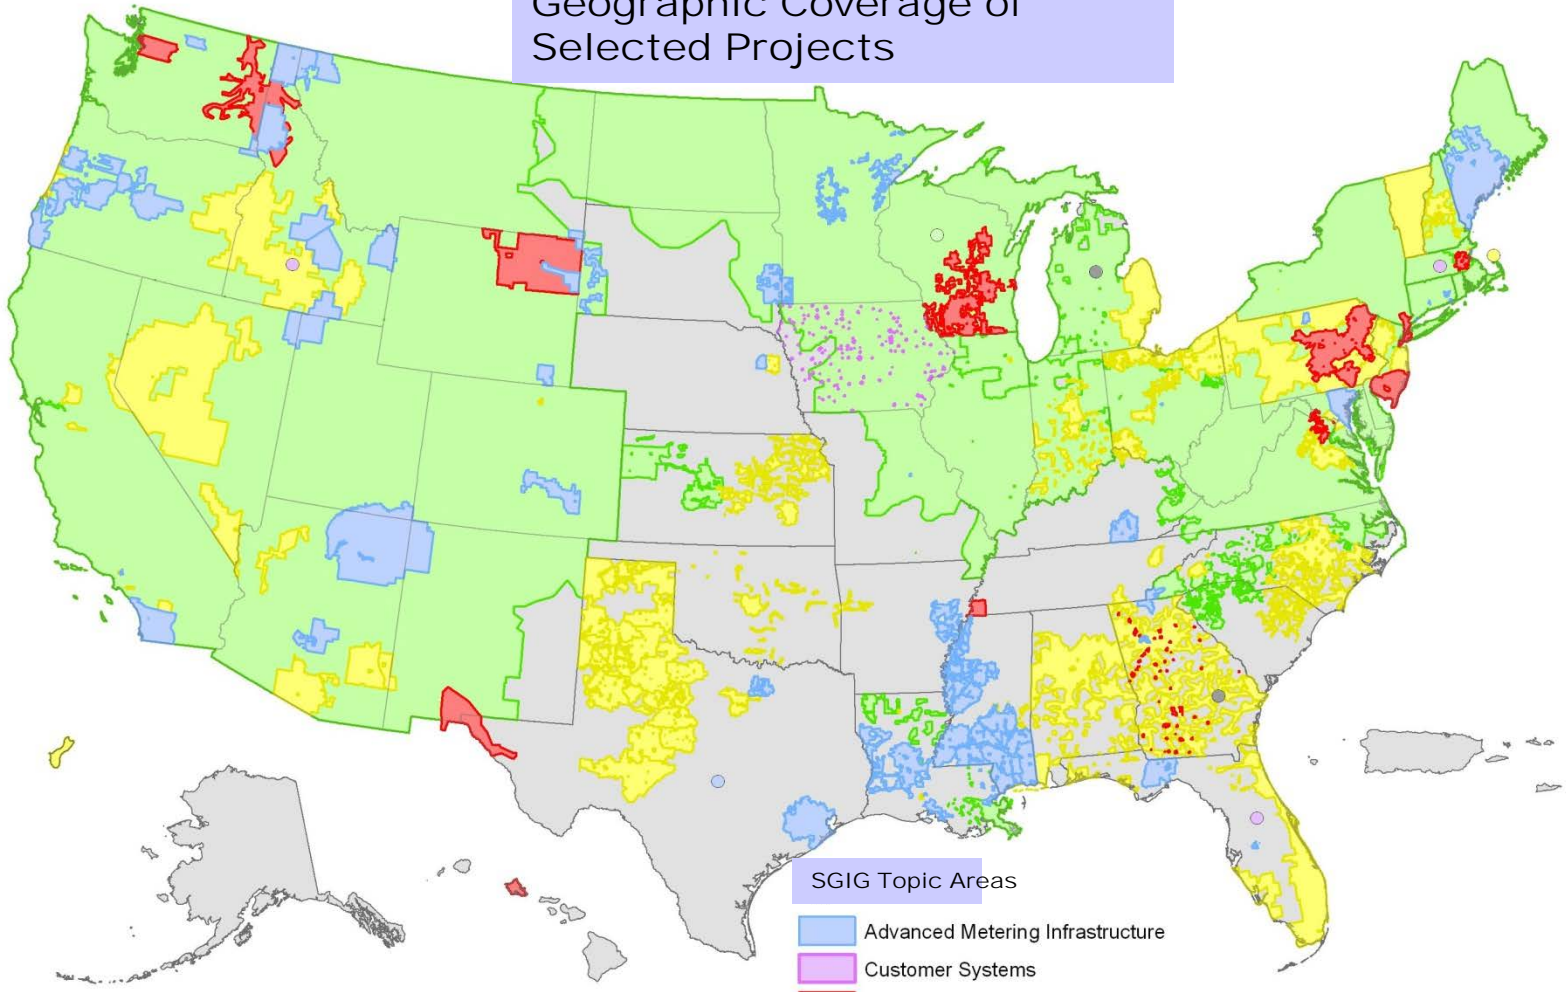

SGIG Electric Transmission Systems Projects

- American Transmission Company, LLC (PMU) \$2.7*
- American Transmission Company, LLC (SCADA) 22.9
- Duke Energy Carolinas, LLC 7.8
- Entergy Services, Inc. 9.2
- Midwest Energy, Inc 1.4
- Midwest ISO, Inc – 15 trans owner partners 34.5
- ISO New England, Inc – 7 18.1
- New York ISO, Inc - 8 75.7
- PJM Interconnection, LLC – 12 27.8
- Western Electricity Coordinating Council – 18 107.8

* Total Project Cost

Geographic Coverage of Selected Projects

SGIG Topic Areas

- Advanced Metering Infrastructure
- Customer Systems
- Electric Systems Distribution
- Electric Transmission Systems
- Equipment Manufacturing
- Integrated and/or Crosscutting Systems

100 Projects

Circle indicates project where specific utility/area is not known.

SMART GRID INVESTMENT GRANTS

Advanced SynchroPhasor Research Projects

\$4.3 million awarded to four, 3-year projects

- **Regents of University of California**
 - Security-Dependability Adaptive Protection System
 - Alarms for Power Swing Encroachment on Relay Characteristics
 - Visualization
 - **Virginia Polytechnic Institute and State University**
 - Develop and Implement Synchrophasor-Based State Estimator
 - Develop Transducer Calibration Techniques
 - Characterize and Analyze Unbalanced Conditions
 - Develop Tools to Determine Optimum Islanding Strategies During Catastrophic System Events
 - Develop Visualization Tools for the 3-phase Tracking State Estimator
- 
- 
- 

Advanced SynchroPhasor Research Projects (con't)

- **Georgia Tech Research Corporation**

- Real-Time Implementation of the Distributed Dynamic State Estimation and Wide-Area Transient Stability Analysis
- Apply to On-Line Generator Parameter Identification to Generators in the NYPA System
- Implement Transient Stability Monitoring at other Plants/Substations

- **Electric Power Research Institute**

- Wide-area, Real-time Visualization of Frequency ,Voltage and Current Contours for Security Monitoring
- On-Line Identification of Major Events
- On-Line Event “Instant” Replay

Advanced SynchroPhasor Research Projects (con't)

- **Washington State University**

Power Grid Reliability and Security – Analysis and Simulation
for a Secure Communication Network from PMU to
Synchrophasor Applications
