

North American SynchroPhasor Initiative Working Group Meeting May 9 & 10, 2007

DoubleTree Hotel – Carson Civic Plaza

The focus of the first meeting of the NASPI (formerly Eastern Interconnection Phasor Project), is to provide working group participants with an update of synchrophasor activities underway in the eastern interconnection. Also, it provides an opportunity to catch up on activities and progress underway within the other interconnections of North America. Southern California Edison Company, which has been one of the leaders for synchrophasor technology deployment in the Western Interconnection, is co-hosting the meeting along with the U.S. Department of Energy (DOE) and the North American Electric Reliability Corporation (NERC).
