

July 23, 2019 Combined Call Notes

Control Room Solutions Task Team (CRSTT)

Co-leads, Michael Cassiadoro
(mcassiodoro@totalreliabilitysolutions.com)
and Jim Kleitsch (jkleitsch@atcllc.com)
Email list address: naspi-taskteam-controlroom@lyris.pnnl.gov

Distribution Task Team (DisTT)

Co-leads, Sascha Von Meier
(vonmeier@berkeley.edu) and
Dan Dietmeyer (DDietmeyer@semprautilities.com)
Email list address: naspi-taskteam-distribution@lyris.pnnl.gov

Teresa Carlon, NASPI support and website and listserv contact (teresa.carlon@pnnl.gov)

Attendees

Roll call – see list below.

Meeting Notes

The CRSTT and DisTT have decided to try and hold joint conference calls in an effort to coordinate on overlapping work products. This format will be tried for the next few months. Please feel free to comment on whether or not you like the combined calls.

CRSTT

- Provided a brief update in the work products and where CRSTT information can be found on the NASPI website.
- Video event files are on the CRSTT web page along with use cases (<https://www.naspi.org/crstt>).
- CRSTT and DisTT hope to collaborate on a future paper, more to come.
- “Train the trainer” Workshop on October 28 (Monday), Richmond, Virginia, just prior to the NASPI Work Group meeting. [Learn more](#) about the workshop!
- Song Zhang of ISO New England presented “[Use PMU Data as a Backup of SCADA for Operation](#)” during our call.

DisTT

- Review of [DisTT Goals and Action Plan](#).
- DisTT would like to build on a set of [use case papers](#); set of five are due for expansion or revisions. Another seven described in last year’s white paper are waiting volunteers. We want to expand the scope of synchronized measurements; time synchronized magnitude and point-on-wave data. Identify most important near-term impact. New possibility for use cases listed in the [action plan](#).
- We like to ask other Operators about the use cases and applications which would provide most and timely value.
- Draft Operator Questions for Discovery of concerns to real-time operations.
- Dan likes the white paper DisTT has done in the past and sees an opportunity for expansion to produce a product that is useful to the control room operators and not necessarily academic in nature. For example gathering feedback on questions such as; knowing what fire risk mitigation strategies are employed by your utility?

- ✓ We'd like to get some volunteers to take these questions to the control room and get feedback from the operators?
- ✓ Panos asserted he is doing work for a Swiss company, preparing a distribution grid survey to evaluate the status of existing technologies used in the utilities and to analyze the use of intelligent systems for monitoring, control, management, and digitization of distribution grids. The survey will be sent out to France, Germany, Switzerland, and Italy. Panos should be able to share the "Green Data" with the DisTT.

Next conference call: August 27, 2019 at 10:00am PT / 1:00pm ET.

Attendees

Athula Rajapakse
Brent Blanchard
Dan Dietmeyer
Frank Tuffner
Harold Kirkham
James Kleitsch
Jeff Zhao
Junbo Zhao
Kevin Chen
Linda He
Manjari Asawa
Mehmet Cintuglu
Mike Cassiadoro
Ole Finseth
Panos Moutis
Sascha von Meier
Sergio Rodriguez-Flores
Shaun Murphy (PJM)
Slava Maslennikov
Song Zhang
Teresa Carlon
