

NASPI Progress Report

Alison Silverstein, NASPI Project Manager
alisonsilverstein@mac.com

NERC Synchronized Measurement
Subcommittee

September 22, 2016

Upcoming NASPI meetings

- October 18, 2016 – NERC-NASPI Model Verification Technical Workshop, Seattle
- October 19-20, 2016 – NASPI Work Group meeting, Seattle (system protection, phase angle monitoring, time synchronization, DOE R&D projects, and more)

NERC-NASPI Technical Workshop on Power Plant Model Verification & Testing

October 18, 2016, 1:00 to 5:00pm

Seattle Marriott Waterfront Hotel

Registration links for Technical Workshop and Work Group meeting (October 19-20) at

<https://www.naspi.org/meetings>

Agenda

- Review of NERC Reliability Guideline for PPMV using PMU data
- Model playback session – demos of commercially available playback tools using a common event data set
- Model calibration session – demos of commercially available MV tools using a common event data set

Other NASPI priorities

- Celebrating success – giving out NASPI awards at October 19, 2016 Work Group meeting
- Improving time synchronization reliability and redundancy
- Data-sharing
- Improving end-to-end data quality
- Update synchrophasor communications architecture
- Make it easier for new users to adopt synchrophasor technology

For more information

NASPI Task Teams:

- Control Room Solutions TT
- Data & Network Management TT
- Distribution TT
- Engineering Analysis TT
- Performance Requirements, Standards & Verification TT
- Phasor Applications Requirements Task Force
- Time Synchronization Task Force
